Hyprland

Add the following settings to your Hyprland configuration file (usually located at `~/.config/hypr/hyprland.conf`).

These settings are for general window appearance and functionality.

```
general {
    gaps_in = 5
    gaps_out = 10
}

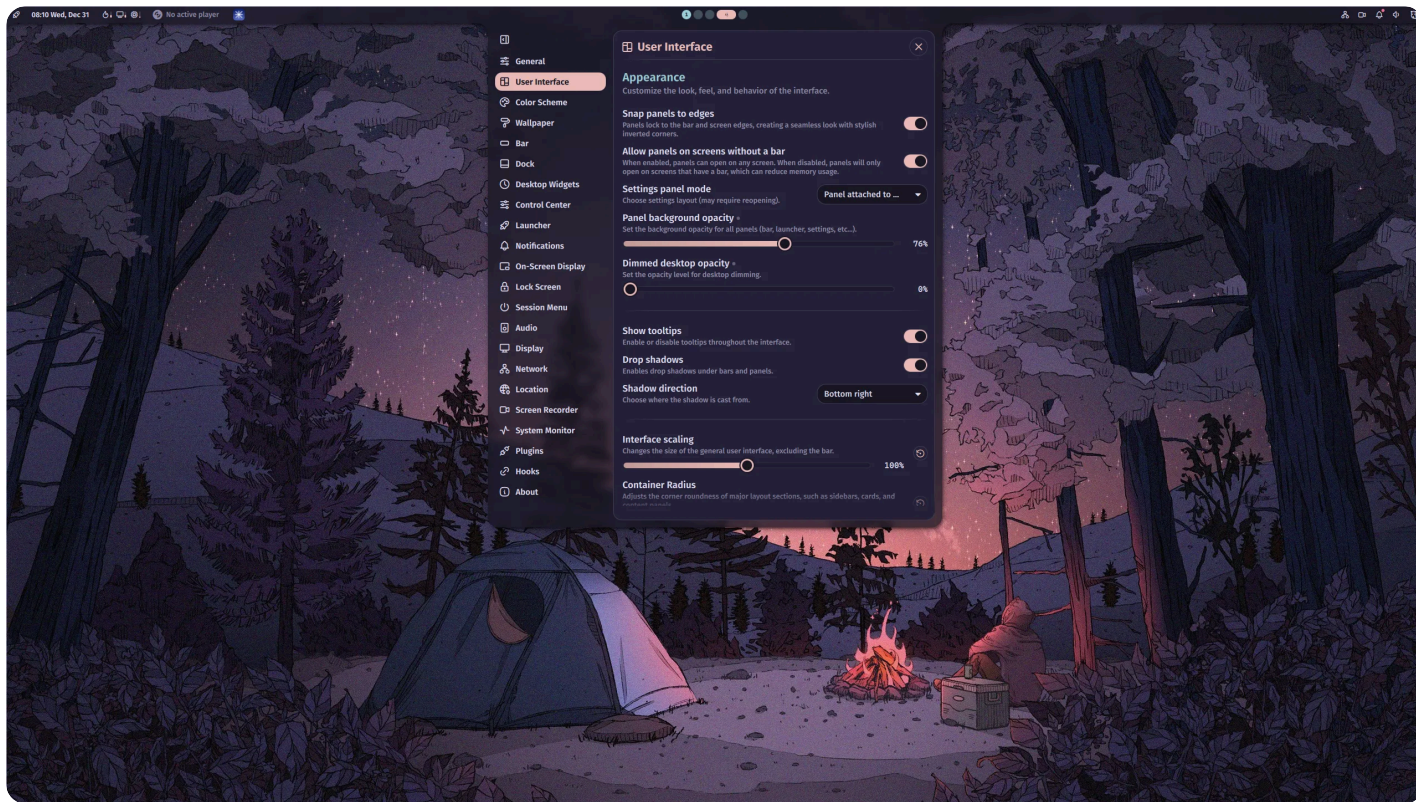

decoration {
    rounding = 20
    rounding_power = 2

    shadow {
        enabled = true
        range = 4
        render_power = 3
        color = rgba(1a1a1aee)
    }

    blur {
        enabled = true
        size = 3
        passes = 2
        vibrancy = 0.1696
    }
}
```

Blur

Blurred bar and panels

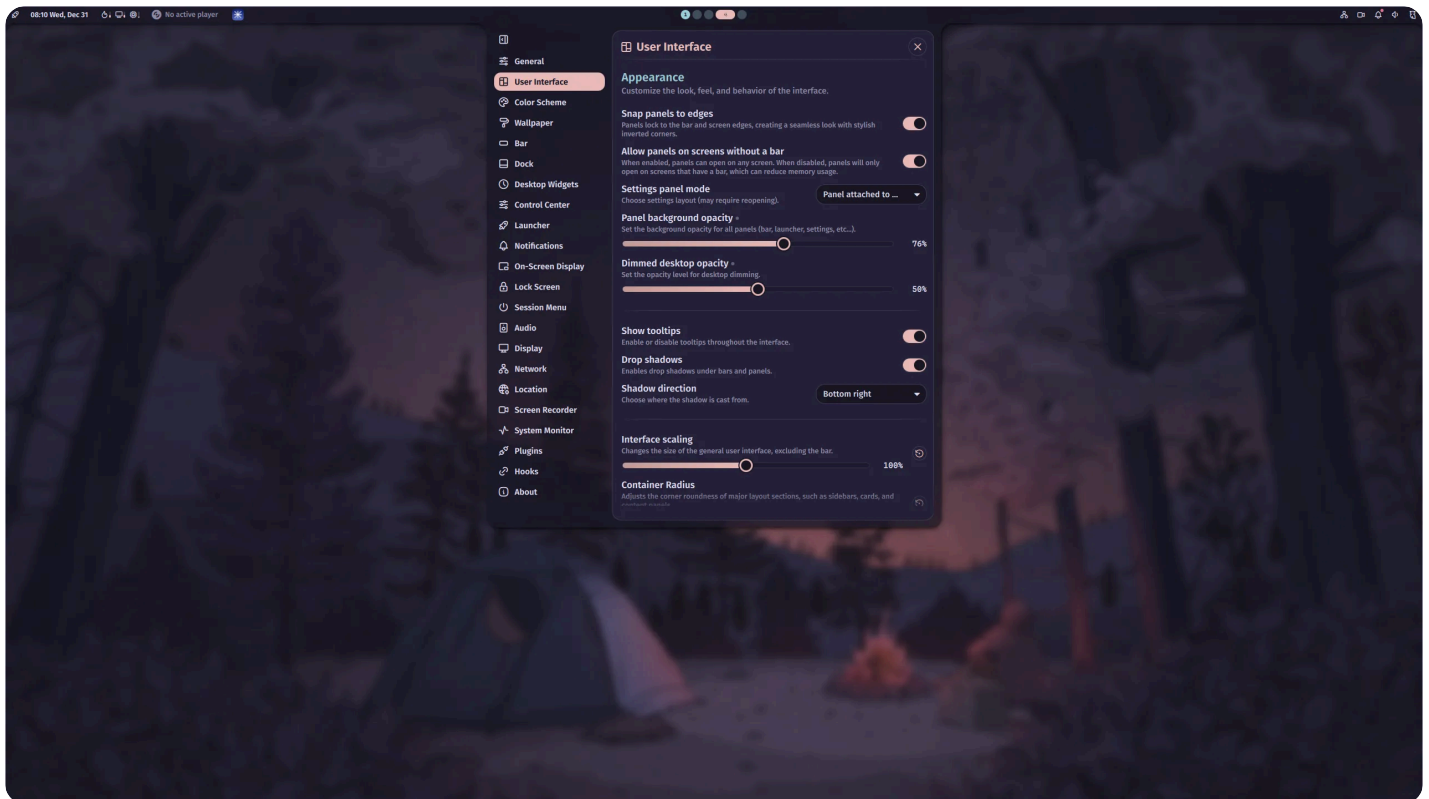

```
layerrule {  
  name = noctalia  
  match:namespace = noctalia-background-.*$  
  ignore_alpha = 0.5  
  blur = true  
  blur_popups = true  
}
```

Fine-tuning the blur effect

You are viewing the **v4 (stable)** documentation. [Switch to v5 \(alpha\)](#) →

to achieve your desired look.

- **Panel background opacity** — Controls panel transparency
- **Bar background opacity** — Controls bar transparency (optional)
- **Dimmed desktop opacity** — Controls the full-screen blur when a panel is open
