matrix-synapse

A federated messaging server with end-to-end encryption.

Social

This NixOS module installs and configures Synapse – a federated Matrix homeserver with end-to-end encryption – and optionally provides the Element web client.

The example below demonstrates a minimal setup that includes:

- Element web client.
- Synapse backed by PostgreSQL and nginx.
- An admin user and an additional regular user.

Example configuration:

```
1 instances = {
2     matrix-synapse = {
3         roles.default.machines."jon".settings = {
4             acmeEmail = "admins@clan.lol";
5             server_tld = "clan.test";
6             app_domain = "matrix.clan.test";
7             users.admin.admin = true;
8             users.someuser = { };
9         };
10    };
11 };
```

Roles

The matrix-synapse service has the following roles:

- default

Options for the `default` role

acmeEmail

Email address for account creation and correspondence from the CA. It is recommended to use the same email for all certs to avoid account creation limits.

Type: `string`

Declared in: [clanServices/matrix-synapse/default.nix](#)

app_domain

The matrix server hostname also serves the element client

Type: `string`

❖ Example

```
"matrix.example.com"
```

Declared in: [clanServices/matrix-synapse/default.nix](#)

server_tld

The address that is suffixed after your username i.e @alice:example.com

Type: `string`

❖ Example

"example.com"

Declared in: [clanServices/matrix-synapse/default.nix](#)

services.matrix-synapse.package

Package to use for matrix-synapse

Type: unspecified value

Declared in: [clanServices/matrix-synapse/default.nix](#)

users

A list of users. Not that only new users will be created and existing ones are not modified.

Type: attribute set of (submodule)

Default:

```
{ }
```

Example

```
1 {  
2   alice = {  
3     admin = true;  
4   };  
5 }
```

Declared in: [clanServices/matrix-synapse/default.nix](#)

users.<name>.admin

Whether the user should be an admin

Type: `boolean`

Default:

`false`

Declared in: [clanServices/matrix-synapse/default.nix](#)

users.<name>.name

The name of the user

Type: `string`

Default:

`"<name>"`

Declared in: [clanServices/matrix-synapse/default.nix](#)
